FOR IMMEDIATE RELEASE

**BOK LEE, M.D., FACS JOINS LIFE SUPPORT TECHNOLOGIES GROUP AS  
CHAIRMAN OF CLINICAL RESEARCH & DEVELOPMENT**

Mount Vernon, NY – Glenn Butler, CEO of Life Support Technologies Group (LST), Mt. Vernon, NY, announced that Bok Lee, M.D., FACS, has joined the company as Chairman of Clinical Research and Development. Dr. Lee is a distinguished vascular surgeon who has published over 200 medical papers and has authored or co-authored nine books. Academic titles he has held include Professor of Surgery at New York Medical College in Valhalla, NY, and Director of Surgical Research at Sound Shore Medical Center, New Rochelle, NY. Dr. Lee is also a past Governor of the American College of Surgeons.

Dr. Lee will join noted physiologist Bill Hamilton, Ph.D., and Noori Al-Waili, M.D., Ph.D., in LST's Research and Development department.

“Dr. Lee’s enthusiasm and impressive medical research background will complement the knowledge and experiences of Drs. Hamilton and Al-Waili as we continue to investigate innovative medical solutions to disease resolution in our varied patient cases,” said Mr. Butler. He added, “Dr. Lee is a welcome addition to our staff.”

Life Support Technologies Group offers comprehensive wound care and hyperbaric medicine services to a number of facilities, including the Mount Vernon Hospital, Westchester Medical Center, and Nassau University Medical Center. LST also offers training in wound care and hyperbaric medicine to medical professionals.

LST has expertise and capabilities in both hyperbaric (increased pressure) and hypobaric (decreased pressure) environments. Its extensive client list includes NASA and also the U.S. Department of Defense Special Operations.
